

## **Ordering promotional gifts via iEMOS**

**This year, there will again be a giveaway distribution at the booth.**

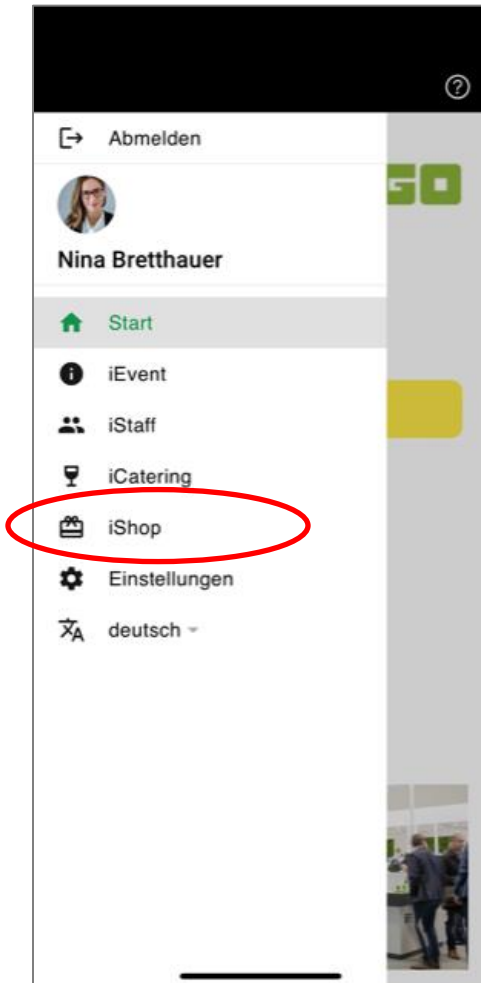

**There are two ways to get promotional gifts for your customers.**

1. You can order the desired promotional gifts directly at the distribution counter, which you will find on the stand. You will find an overview of the available gifts on site.
2. You use the iEMOS app, which you also use to check in and out at the stand, to pre-order the promotional gifts and then collect them at the counter when you are ready. On the following pages you will find instructions on how this works.

**ATTENTION: It is no longer possible to simply take promotional gifts from the storage room, as otherwise the stock for the ordering system cannot be kept up to date.**

\* Images are exemplary and may differ from the actual look in the app

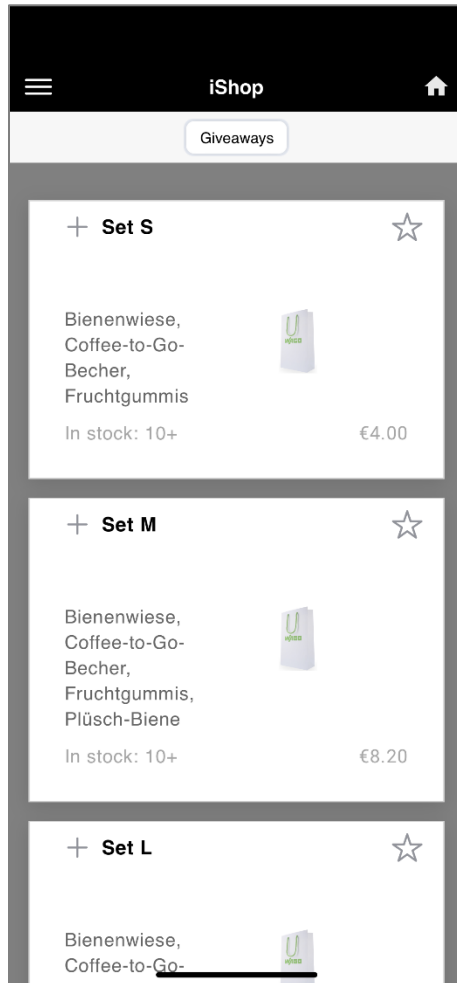

In the main menu (accessible via the 3 horizontal lines at the top left of the start page), select 'iShop'.

The iShop provides you with an overview of all promotional gifts that are in stock at the trade fair and can therefore be ordered.

**Please note: the price shown is intended to give you an overview of the value of the gift. Of course, you do not have to pay for the promotional gifts.**

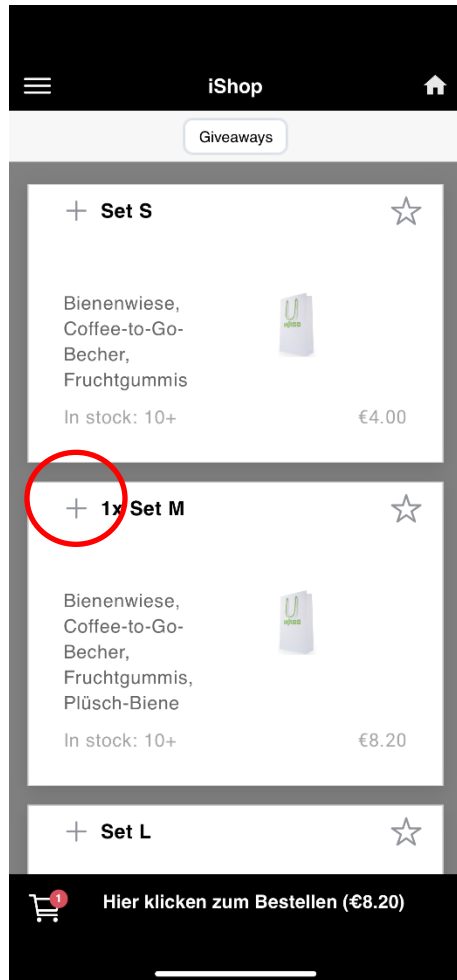

As soon as you have made your decision, add the desired product to your shopping cart using the respective + symbol.

If a particular promotional gift becomes empty during the trade fair, you will no longer be able to select it.

As soon as you have added a product, the black bar 'Click here to order / Hier klicken zum Bestellen' at the bottom of the screen will take you to your shopping cart.

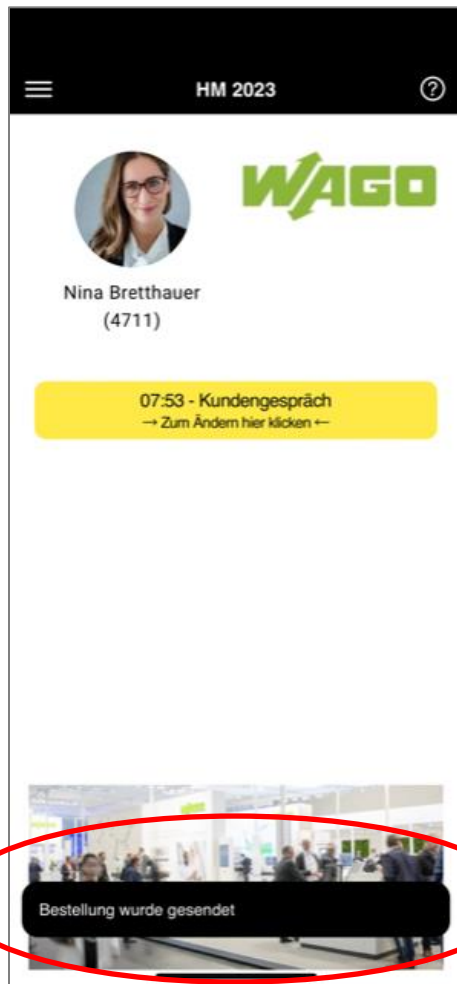

In the shopping cart you can then, if desired, make further changes to the number of items or return to the overview via 'Add further products' to add further promotional gifts to your shopping cart. Please note that we are still in a test phase and the 'Liefern an / Deliver to' option should not yet be used.

Confirm your order by clicking on the black 'Zum Bestellen klicken / Click to order' button.

A screenshot of a mobile application's shopping cart interface. At the top, the status bar shows the time 08:24, 5G signal, and battery level. The app header has a close icon (X) and the title 'Warenkorb'. The cart contains one item: '1 Set M' priced at '€8.20'. Below the item are minus and plus buttons for quantity adjustment. A horizontal line separates the item from the total, which is 'Gesamt €8.20'. Below the total is a section for 'Liefern an' (Delivery to) with a greyed-out input field. A black button with white text 'Zum Bestellen klicken' is centered below the delivery field. At the bottom, a grey bar contains the text 'Weitere Produkte hinzufügen' (Add more products).

You will then automatically be taken back to the start page, where you will be shown once again that your order has been 'dispatched' to the storage room for packing.

Now go to the giveaway counter and state your name. The colleagues at the counter can then hand you the promotional gifts you have ordered.
